Conservation Genetics Cell, WII, Dehradun,
Uttarakhand
Wildlife Forensics (Wildlife Interface)

Adv. Javed Ahmed, Prosecution Officer,
District Dehradun, Uttarakhand
Legal Expert (Courtroom Perspective)

Concept Note

Death Investigation

is not about procedures and protocols; it is a quiet dialogue between science and justice. At the crime scene, fragments of truth lie scattered. At the autopsy table, those fragments begin to speak. In the courtroom, they must withstand scrutiny, logic, and law. The journey of evidence is neither linear nor simple. A lapse in preservation, an ambiguity in documentation, or an imprecise interpretation can alter the course of justice. Autopsy surgeons, investigators, forensic scientists, and legal professionals each carry a distinct responsibility within this chain, yet the integrity of the outcome depends upon collective clarity and coordinated effort.

This One-Day Continuing Medical Education (CME), “**Forensic Evidence: From Crime Scene to Autopsy to Courtroom- Part I,**” is conceived as a capacity-building interaction to strengthen that continuum. Through academic deliberation, case-based discussions, and interdisciplinary dialogue, the programme seeks to refine medico-legal practice, enhance courtroom readiness, and reaffirm the shared commitment to truth, scientific rigour, and justice.

Target Participants: Doctors | Police Officers | Lawyers | FSL Officers | Paramedicals | MBBS Students | Students of respective disciplines |
